SUBMISSION UNDER 37 CFR § 1.114

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir,

This paper is a submission under 37 CFR § 1.114. In the paper mailed April 22, 2004, the Office approved the Request for Continued Examination (RCE) and the request for suspension of action until June 20, 2004. Reexamination, reconsideration and allowance are respectfully requested in view of the Amendments and Remarks below. For the avoidance of doubt, it is noted that the RCE requested NON-ENTRY of the amendments requested in the Reply mailed February 20, 2004, to the final Office Action mailed October 20, 2004. Thus, the starting point for the amendments set out below is the specification as it was examined for the final Office Action mailed October 20, 2004.

Amendments to the Specification begin on page 3 of this paper.

Amendments to the Claims are reflected in the listing of claims which begins on page 11 of this paper.

Remarks/Arguments begin on page 21 of this paper.

CERTIFICATE OF MAILING UNDER 37 CFR §1.8

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to the Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450, on the date shown below:

Name of person signing certificate: Marquerite E. Gerstner

Signature: Marquerite E. Gerstner Date: June 21, 2004

Page and Line References to the PCT specification in this Reply

Except where otherwise noted, the references in this Reply to the PCT specification are to the text filed at the PTO when filing the application under 35 USC § 371, which is believed to be the same as the text originally filed with the PCT application itself. However, there are minor differences between the PCT specification filed with the application under 35 USC § 371 and the published PCT specification. These differences relate only to the precise positioning of the words on the pages, not to the words themselves. It seems possible that the Examiner is working from the published PCT specification. Therefore, where there is a difference between the PCT specification filed with the application under 35 USC 371 and the published PCT specification, the page and line reference in the published PCT specification is also given in parentheses. Neither the PCT specification filed with the application under 35 USC § 371 nor the published PCT specification contains line numbers. The line numbers given in this Reply are based on a count of all the lines, including the lines which do not contain words; thus, the number of a line at the end of one paragraph, and the number of a line at the end of the next paragraph, differ by a count of 2.
